

# ABOUT THE TRAIL

The Forest of Dean Sculpture Trail is a collection of artworks that have been in-spired by the unique heritage of this forest.

The Trail's sculptures are developed and influenced by the distinctive qualities and landscape, both historically and physically, of the Forest of Dean. They have been intentionally left to be reclaimed by the forest over time, naturally eroding from weather, animals, plant growth and the footfall of the visiting public.

The trail was founded in 1986 and the artworks on the trail have all been commissioned by the Forest of Dean Sculpture Trust, a charity that works in close partnership with the Forestry Commission as part of their national Forest Art Works programme.

For further information and updates on the Forest of Dean Sculpture Trust visit [forestofdean-sculpture.org.uk](http://forestofdean-sculpture.org.uk) and for details on Forest Art Works visit [forestry.gov.uk/forestartworks](http://forestry.gov.uk/forestartworks).

The Forest of Dean Sculpture Trust is a registered charity. If you would like to help support the Trust please get in touch to make a donation via our website.

Please share what you think of the Sculpture Trail.

## THE SCULPTURES

### 1 DEAD WOOD/BOIS MORT

Carole Drake 1995

Places of burial and concealment are suggested by these five steel plates dug into the forest floor, linking back to memories of the European forests devastated by war.

### 2 THE HEART OF STONE

Tim Lees 1988

Created using local stone, this sculpture echoes the shaft of the drift mine on which it sits. The fish-like shape alludes to the geographic location of the forest, which is situated between the two rivers of the Wye and the Severn.

### 3 YAŞASIN

Pomona Zipser 2016

The title of this piece translates into Turkish as 'Hooray'. Move through and around this playful and interactive sculpture to view the forest from different perspectives.

### 4 BLACK DOME

David Nash 1986

This dome was made by packing together 900 pieces of charred larch. Inspired by old charcoal hearths, this work is returning to the forest floor. Some of the timber appears to have petrified, compressed by the many feet that have climbed over it.

### 5 FIRE & WATER BOATS

David Nash 1986

These charred boats resemble canoes carved by hand from a single piece of wood. The waterway in which they sit was previously used to drain the mines underneath the forest.

### 6 IRON ROAD

Keir Smith 1986

Twenty carved jarrah wood railway sleepers represent the train line that used to run through the forest carrying coal and iron. Each sleeper illustrates an aspect of the forest, from smelting to writing, charcoal to hunting.

### 7 SEARCHER

Sophie Ryder 1988

Constructed from wire, this life-size sculpture can be seen in the distance as you pass along the trail.

### 8 IN SITU

Erika Tan 2004

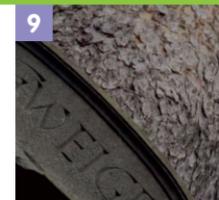

Bamboo, both real and recreated, finds an unlikely home in this English forest environment. Mounds, hollows and circles traced in the earth link back to the industrial past of the area.

### 9 GROVE OF SILENCE

Ian Hamilton Finlay 1986

High in the trees, these three plaques draw attention to the stillness of their environment. Their simplicity of form offers a space for contemplation.

### 10 CONE & VESSEL

Peter Randall-Page 1988

Carved in stone, the details of an acorn cup and fir cone are amplified to reveal their scientific patterns.

### 11 Hill33

David Cotterrell 2010

Built from an industrial engineering material and filled with local coal spoil this sculpture evokes questions about landscape and power. It is slowly collapsing and being taken over by the nature.

### 12 HOUSE

Miles Davies 1988

Reminiscent of the mineshafts that probe deep into the forest below, this house also alludes to the forest being a home to many.

### 13 COAL MEASURE GIANTS

Henry Castle 2016

300 million-year old tree fossils sit alongside two cast iron sculptures sited 300 metres apart, representing the distance of the nearest coal seam below ground.

### 14 ECHO

Annie Cattrell 2008

Cast from the face of the quarry in which this sculpture sits, Echo captures a moment of this rock's life preserved in monochrome, drawing attention to surface detail and texture.

### 15 CATHEDRAL

Kevin Atherton 1986

An avenue of trees creates a sense of a cathedral's aisle and the experience of awe that such impressive architecture evokes. Instead of religious imagery depicted, we see the life of the forest in brilliantly coloured glass.

### 16 HANGING FIRE

Cornelia Parker 1986

Locally smelted iron ore has been formed into rings of flames high up in the trees. A poetic work that implies the crowning of the trees in this once royal forest.

# THE TRAIL

Follow the purple waymarker posts. Some artworks are off the trail so make sure you rejoin the main trail and keep an eye out for some of the more elusive sculptures.

**Sculpture Trail (sculptures 1–16)** ●●●●  
Approx 7km (4.5 miles), 2–3 hours

If you don't fancy walking the whole trail you can take one of two shortcuts signposted back to Beechenhurst Lodge:

**Shortcut A (sculptures 1–6)** ●●●●  
Approx 3.5km (2.2 miles), 1–1½ hours

**Shortcut B (sculptures 1–12)** ●●●●  
4.8km (3 miles), 1½–2 hours

## Accessibility

The Sculpture Trail is situated on the side of the Cannop Valley, as such there are steep slopes and uneven terrain throughout making it unsuitable for many pushchairs and wheelchairs. A trampler can be hired in advance from Cannop Cycle Centre: **01594 822073**. Should you not wish to walk the entire trail, the Speech House Woodlands car park allows closer access to the sculptures found at the end of the Trail (15 & 16). We welcome feedback to continue to improve accessibility. You can get in touch at [westengland@forestry.gsi.gov.uk](mailto:westengland@forestry.gsi.gov.uk)

## Follow the Forest Code

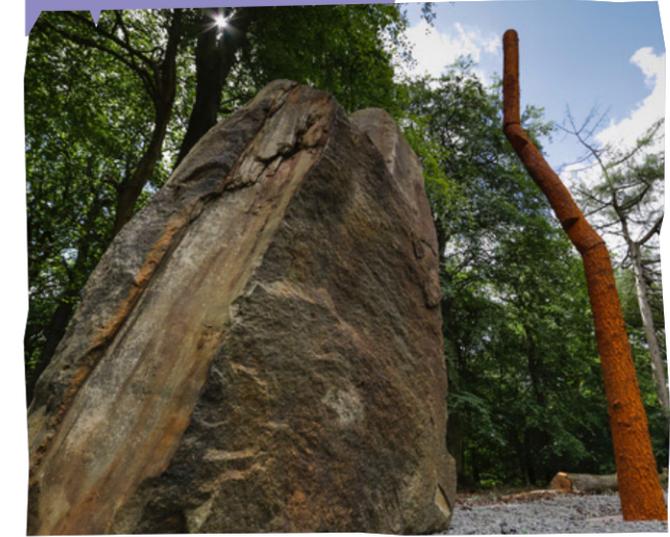

- 🕒 Guard against all risks of fire.
- 🌿 Protect and respect wildlife, plants and trees.
- 🐕 Keep dogs under control & tidy after them.
- 🗑️ Take your litter home.
- 🗣️ Make no unnecessary noise.
- 📸 Take only memories away.
