

**Wood** is a really good material for building things because it is strong.

**Birds** also use wood to make thier homes.

**Creativitree # 28**

## Creativitree # 28

Have a go at being a bird and building your own nest! Share a photo of your nest with us.

- Find a tree with low branches or a shrub. Build your nest here.
- Collect sticks to make the structure of your nest. Can you find some bendy ones to make a round nest shape?
- Don't forget to line your nest with lots of warm, insulating material such as moss, feathers or dead, dry leaves.
- For added fun try being like a bird and use a peg rather than your hands. Hold the peg between your thumb and finger and collect materials in the same way that a bird does with its beak!
- Gently shake the tree or branch, how secure is your nest? Look for some small stones or cones that could be your eggs. Place them in your nest and take a photo!
