The sculptures

The Heart of Stone Tim Lees 1988

Created using local stone, this sculpture echoes the shaft of the drift mine on which it sits. The fish-like shape alludes to the geographic location of the forest, which is situated between the two rivers of the Wye and the Severn.

### Soil Unsoiled

Khady Gueye and Zakiya Mckenzie 2021

A charred monolith etched with a poem that contemplates lived experience of racial inequality in the Forest of Dean.

### Iron Road Keir Smith 1986

Twenty carved jarrah wood railway sleepers represent the train line that used to run through the forest carrying coal and iron. Each sleeper illustrates an aspect of the forest, from smelting to writing, charcoal to hunting.

### In Situ Erika Tan 2004

Bamboo, both real and recreated, finds an unlikely home in this English forest environment. Mounds. hollows and circles traced in the earth link back to the industrial past of the area.

### Cone & Vessel Peter Randall-Page 1988

Carved in stone, the details of an acorn cup and fir cone are amplified to reveal their scientific patterns.

### House Miles Davies 1988

Reminiscent of the mineshafts that probe deep into the forest below, this house also alludes to the forest being a home to many.

### Coal Measure Giants Henry Castle 2016

300 million year-old tree fossils sit alongside two cast iron sculptures sited 300 metres apart, representing the distance of the nearest coal seam below ground.

### Cathedral Kevin Atherton 1986

An avenue of trees creates a sense of a cathedral's aisle and the experience of awe that such impressive architecture evokes. Instead of religious imagery depicted we see the life of the forest in brilliantly coloured glass.

### Yaşasin Pomona Zipser 2016

The title of this piece translates into Turkish as 'Hooray'. Move through and around this playful and interactive sculpture to view the forest from different perspectives.

### Fire & Water Boats David Nash 1986

These charred boats resemble canoes carved by hand from a single piece of wood. The waterway in which they sit was previously used to drain the mines underneath the forest.

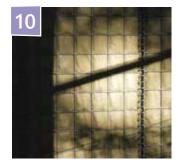

### Searcher Sophie Ryder 1988

Constructed from wire, this life-size sculpture can be seen in the distance as you pass along the trail.

### Grove of Silence Ian Hamilton Finlay 1986

High in the trees, these three plagues draw attention to the stillness of their environment. Their simplicity of form offers a space for contemplation.

### Hill33 David Cotterrell 2010

Built from an industrial engineering material and filled with local coal spoil this sculpture evokes questions about landscape and power. It is slowly collapsing and being taken over by the nature.

### Threshold Natasha Rosling 2019

This crevice formation reveals a patchwork of subterranean rock faces cast from Clearwell Caves iron ore mine, recalling a history of labour through the marks left by miners in the rock.

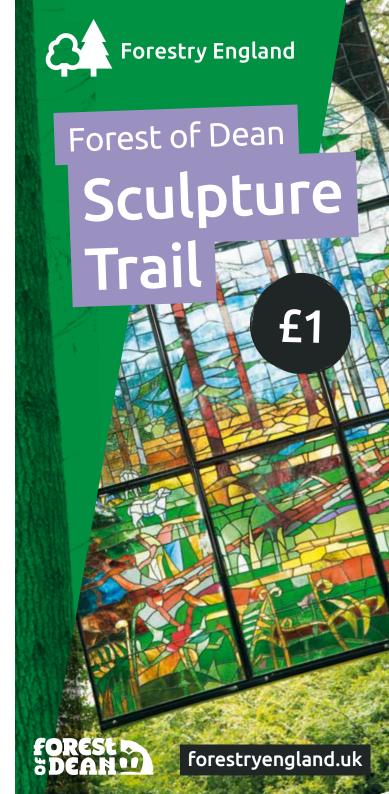

### Echo Annie Cattrell 2008

Cast from the face of the guarry in which this sculpture sits, Echo captures a moment of this rock's life preserved in monochrome, drawing attention to surface detail and texture.

Hanging Fire Cornelia Parker 1986

Locally smelted iron ore has been formed into rings of flames high up in the trees. A poetic work that implies the crowning of the trees in this once royal forest.

# About the trail

Forestry England presents the Forest of Dean Sculpture Trail, a collection of artworks that have been inspired by the unique heritage of this forest.

The trail's sculptures are developed and influenced by and physically, of the <u>Forest</u> of Dean. They have been ntentionally left to be reclaimed by the forest over time, naturally eroding from growth and the footfall of

The trail was founded in 1986 and the artworks on the trail have been commissioned by the Forest of Dean Sculpture Trust, a charity that works

## Trail information

## **Sculpture Trail** •••

Approx. 7km (4.5 miles), 2-3 hours

Follow the purple waymarker posts. Some artworks are off the trail so make sure you rejoin the main trail and keep an eye out for some of the more elusive sculptures. If you don't fancy walking the whole trail you can take one of two shortcuts signposted back to Beechenhurst.

## Shortcut A (sculptures 1-5) ···

Approx 3.5km (2.2 miles), 1-11/2 hours

## Shortcut B (sculptures 1–12) ···

4.8km (3 miles), 1½-2 hours

## Forest to Forest Trail •••

Approx. 1km (0.6 miles), 20-30 minutes

Forest to Forest is a new temporary trail which runs alongside the existing sculpture trail. Featuring eight artists from the UK and overseas the sculptures celebrate forest wildlife, flora and fauna and present a diversity of voices.

### **Accessibility**

The Sculpture Trail is situated on the side of the Cannop Valley, as such there are steep slopes and uneven terrain throughout making it unsuitable for many pushchairs and wheelchairs. We welcome feedback to continue to improve accessibility. You can get in touch at westengland@forestryengland.uk.
