# Spring i-spy

family activity

As we emerge into the longer, brighter days of spring, nature starts to come to life, providing a feast for your senses.

Bumblebees begin bumbling, butterflies are also out looking for pollen, and ponds fill with frogs, and then frogspawn, in the spring months.

What signs of spring can you spot from your window or during your daily outdoor exercise?

Pussy Willow

Daffodils

Daisies

Primrose

Cherry blossom

Catkin

Grape Hyacinth

Frogspawn

Birds nest
