

Forestry England

Landscape change case study

Wild Ennerdale

Ennerdale is a valley on the western edge of the Lake District in northern England. It is one of the longest running wild land restoration projects in England.

- 1 Annotate the photo below to describe the landscape of Ennerdale.

- 2 Describe the location of Ennerdale.

a When was the first Wild Ennerdale Stewardship Plan launched?

b What are the aims of the current Stewardship Plan (2018-2028)?

4 Today, woods and forests are managed sensitively and sustainably. How have management practices changed to improve biodiversity?

[illegible]

5 Ennerdale is a popular destination for visitors.

a Make a list of the attractions and opportunities for people visiting Ennerdale.

b Select one activity that you would like to take part in and explain your choice.

.....

.....

.....

.....

6 Wild Ennerdale is managed to improve climate change resilience.

a Explain how trees can 'lock up carbon' and therefore help to reduce climate change.

b How is Ennerdale being managed to reduce the likelihood of flooding downstream?

c How can the management of Wild Ennerdale be an example to others in addressing issues of climate change?

7 **a** Make a list of words that help to describe Ennerdale. These could be associated with features of the landscape, such as 'mountains,' feelings, such as 'awesome,' or words to do with the management practices.

b Now use your word list to write a Haiku poem. This is a traditional Japanese poetic form that has three lines only. The first line is five syllables, the second line seven syllables and the third line five syllables.
