Habitat Restoration and Felling Map

- Manage native broadleaf woodland using a Shelterwood System to allow young native broadleaf trees to become established under the shelter of existing trees.
  - Gradually remove conifer over the next 30-40 years in a series of operations using a Shelterwood System. Leave selected conifer trees in groups or as scattered individuals where appropriate.
  - Remove conifer from mixed woodland in one operation, leaving selected conifer trees in groups or as scattered individuals where appropriate.
  - Select trees within Bedgebury Pinetum for thinning, felling and pruning on an individual basis to enhance the conservation and recreation value of this area.
  - Minimum intervention woodland (Natural Reserve).
  - Retain conifer woodland in the long term.
  - Coppice woodland on a rotation.
  - Existing open space.
