# Mobility Scooters

Our mobility scooters are outdoor vehicles designed to provide a comfortable ride on our hard paths.

All scooters have holders to put walking sticks or crutches as well as a basket for your bags - personal belongings must be stored in the appropriate place, to not become a potential hazard. The seat and driving console are adjustable for your needs, and the controls are all done with your hands.

Forestry England

# Wheelchairs

Wheelchairs we have available to hire are an easy way to get round the arboretum.

They are best if pushed but they do have hand rails for self-propulsion.

Forestry England

# Trike Push Wheelchair

MT Push is our buddy chair and provides inclusive access as it has the ability to handle bumps in our paths and hills.

This Trike comes with a built-in push handle so you can be pushed in style with a padded bucket chair, headrest and adjustable armrests for rider comfort. Raised handle with breaks provide ease of use and manoeuvrability for the person pushing.
