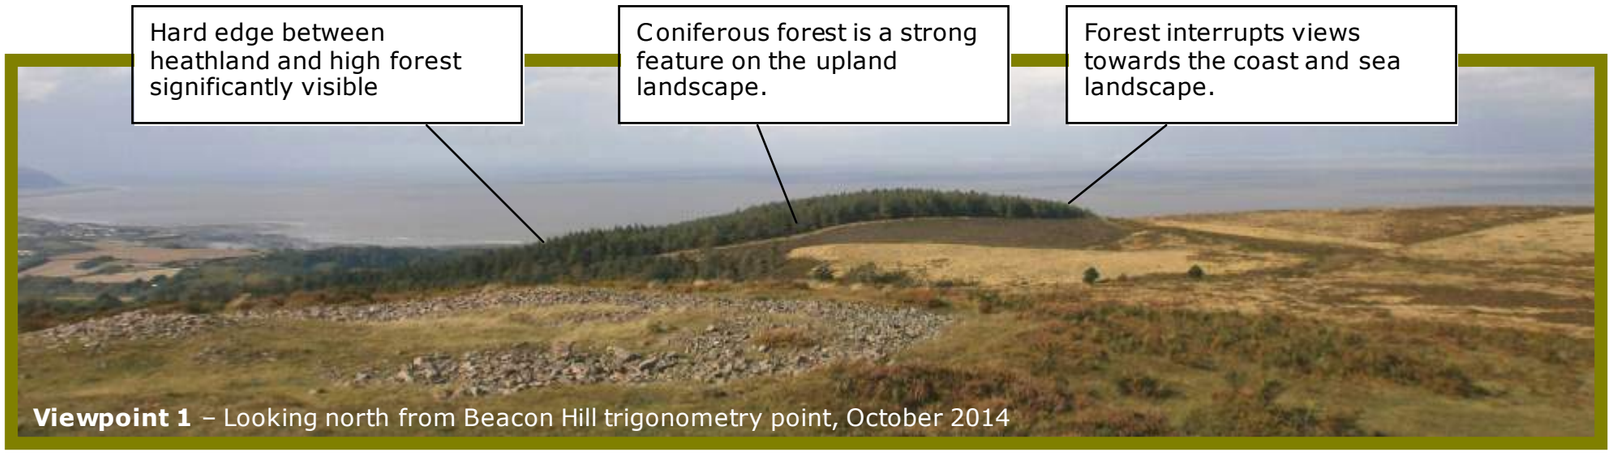
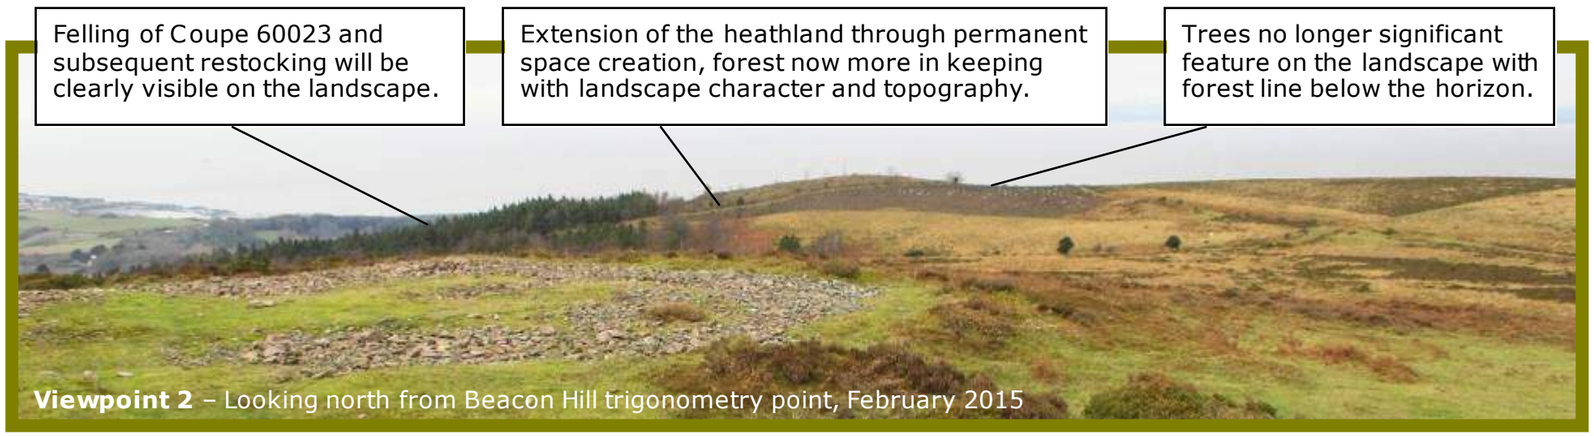
Landscape Analysis

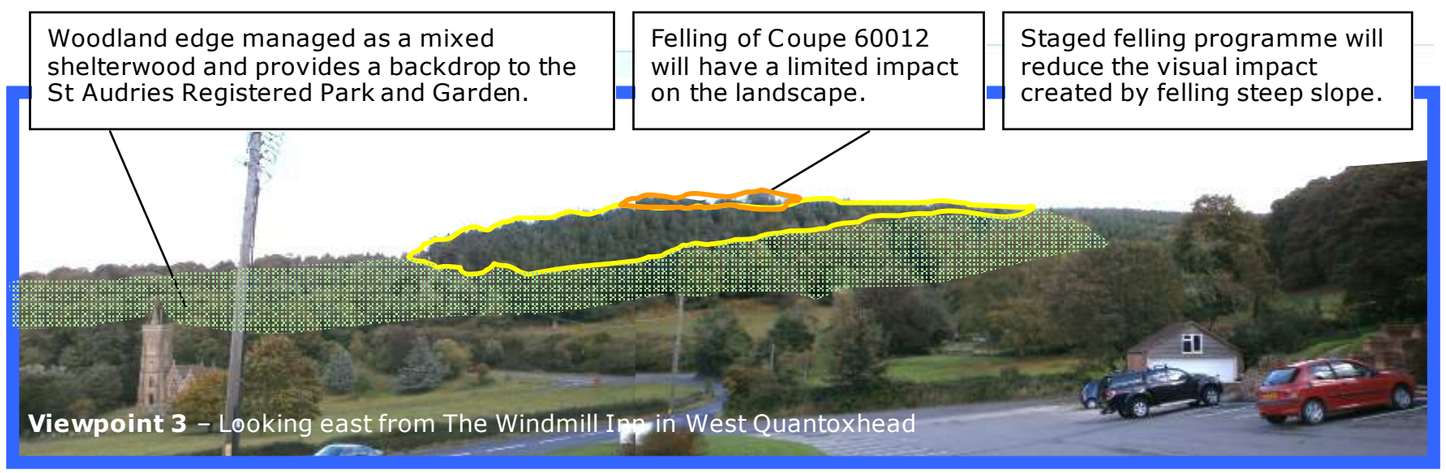
St Audries



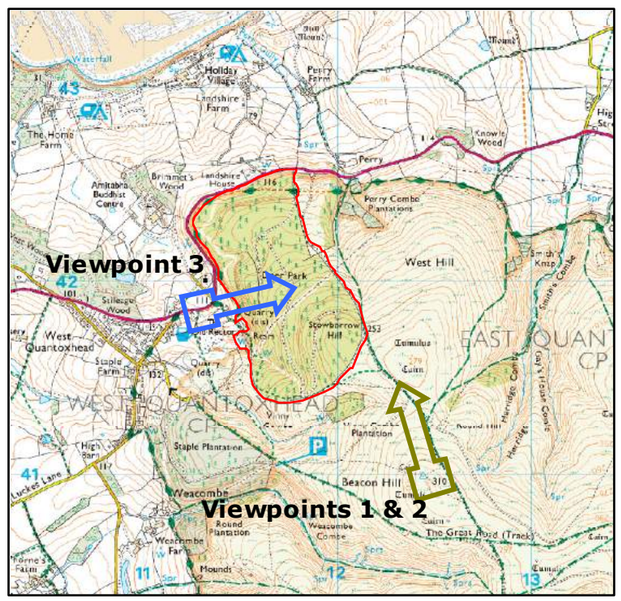
Viewpoint 1 – Looking north from Beacon Hill trigonometry point, October 2014



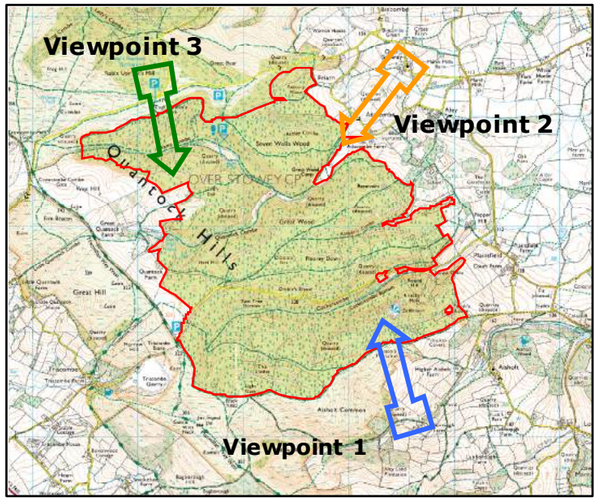
Viewpoint 2 – Looking north from Beacon Hill trigonometry point, February 2015



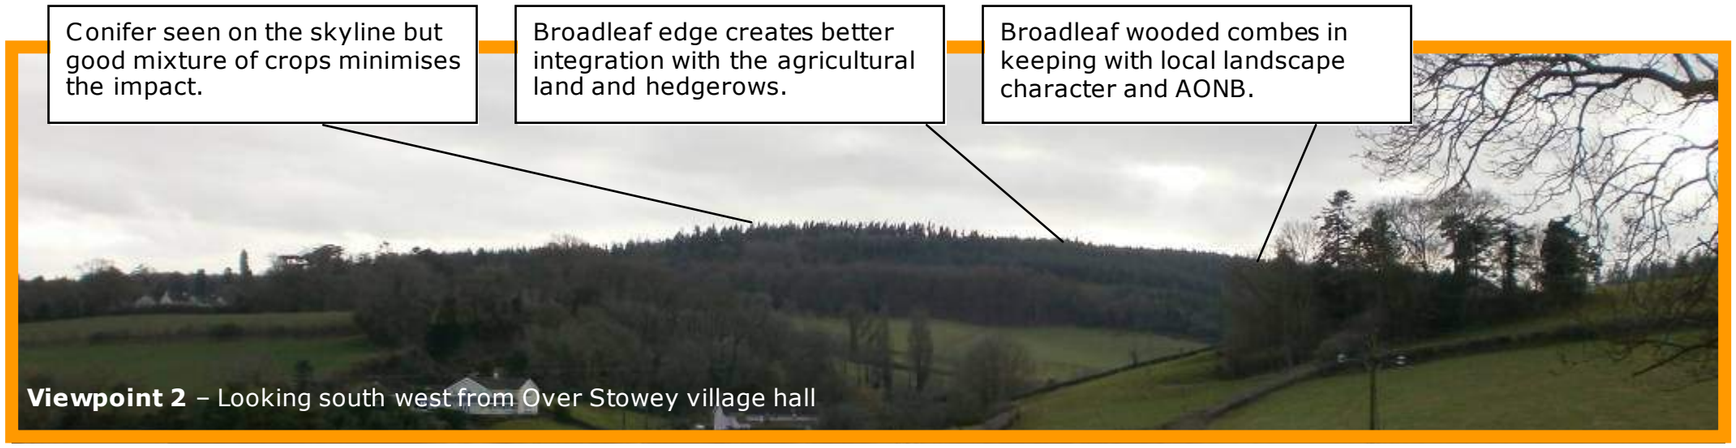
Viewpoint 3 – Looking east from The Windmill Inn in West Quantoxhead



Great Wood



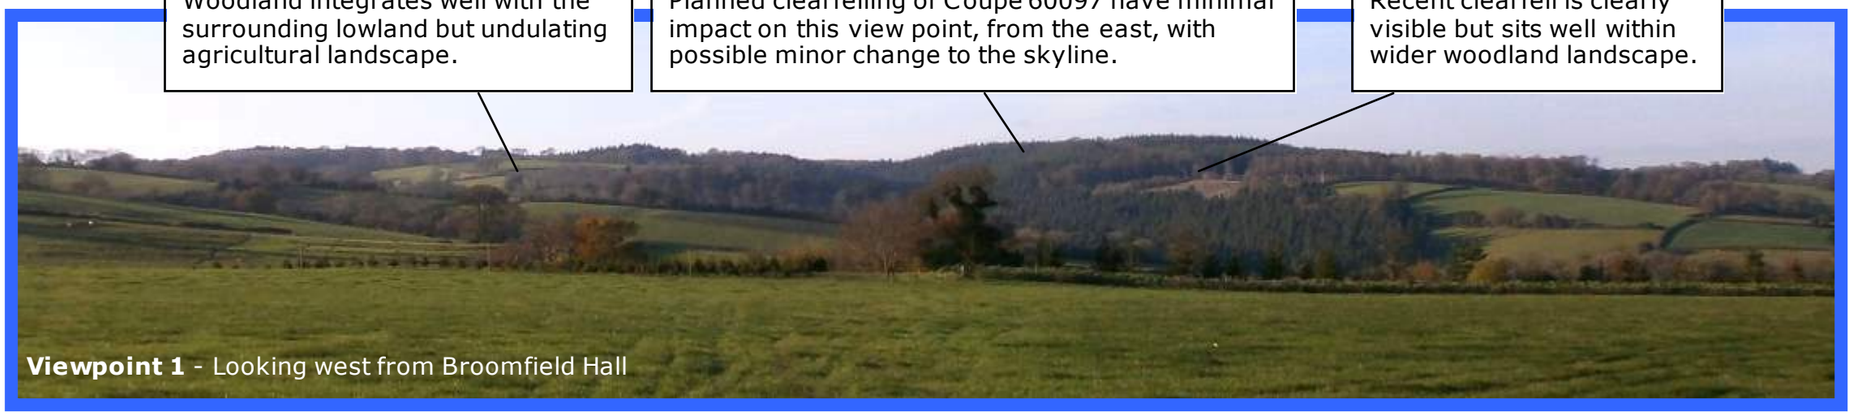
Viewpoint 1- Looking north from Durborough Farm



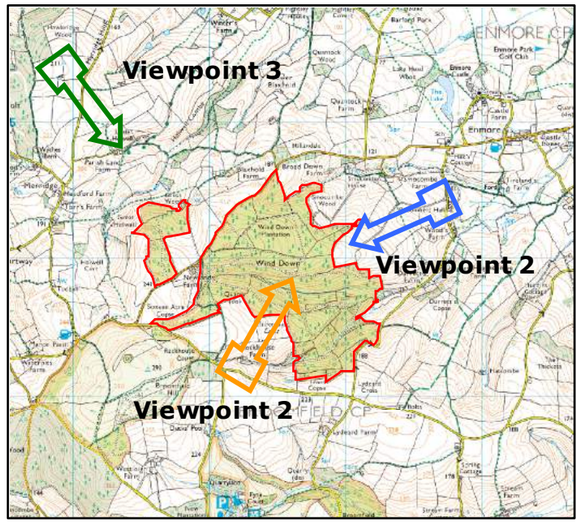
Viewpoint 2 – Looking south west from Over Stowey village hall

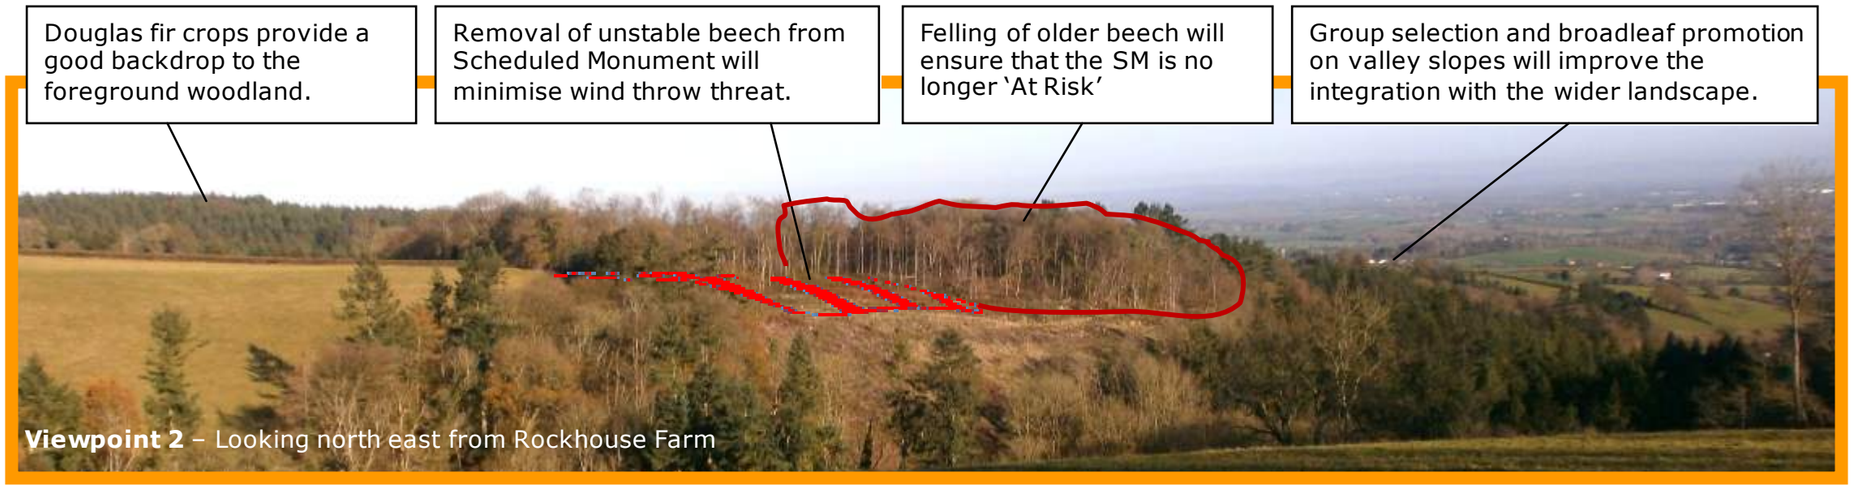
Viewpoint 3 – Looking south from Robin Upright's Hill car park

Wind Down

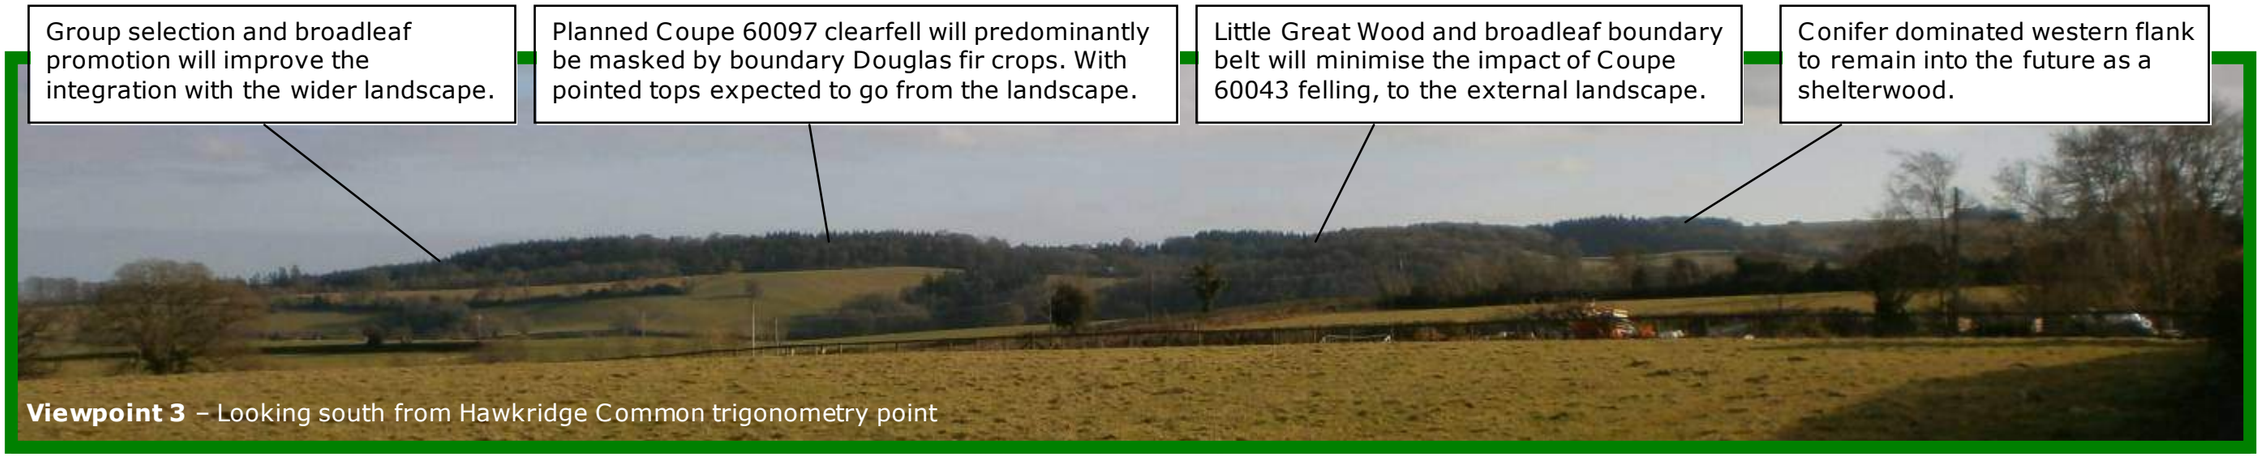


Viewpoint 1 - Looking west from Broomfield Hall





Viewpoint 2 – Looking north east from Rockhouse Farm



Viewpoint 3 – Looking south from Hawkridge Common trigonometry point

Woodland provides a good backdrop to Halswell House and Park, as intended.

Recent felling impact can be seen with sky visible through boundary screen, but landscape value has been maintained.

Undulating agricultural land and copses accentuated by woodland. Greater broadleaf cover will improve in line with Registered Park and Garden aspirations.

Viewpoint 1 – Looking south from Halswell House drive

Hard edge between agricultural fields and high forest. Recent operations have minimised this where appropriate.

Recent felling has had minimal impact on the external landscape value

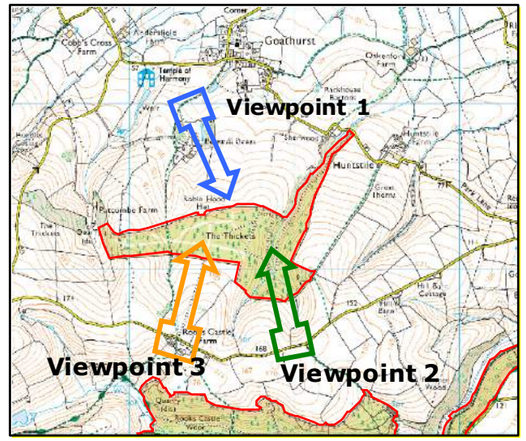
Wooded combes in keeping with the landscape character

Mixtures of conifer and broadleaf continue to deliver diverse wooded landscape

Viewpoint 2 – Looking north from south road

]

Goathurst

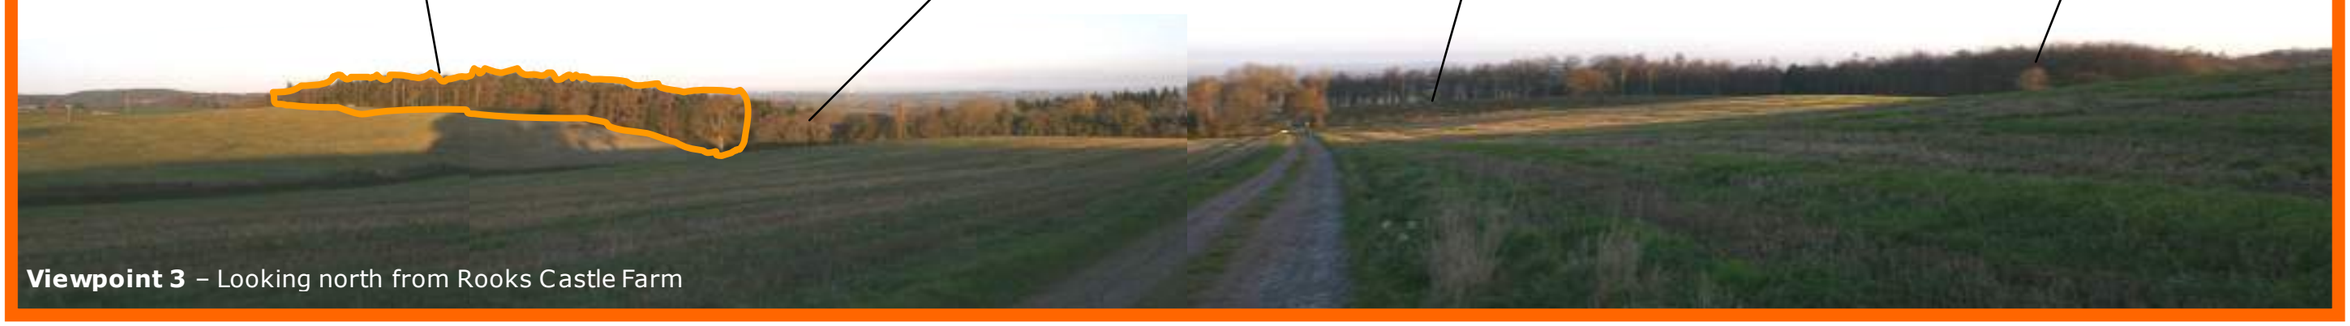


Felling of Coupe 60273 will be clearly visible and create a view through the woodland to the other side. Restocking with greater broadleaf proportion will deliver a more mixed woodland.

Wooded combes in keeping with the local landscape character.

Recent felling impact can be clearly seen but landscape value has been maintained.

Broadleaf dominated east flank will continue to be managed as a high forest shelterwood, thus maintaining landscape value.



Viewpoint 3 – Looking north from Rooks Castle Farm
