

Trees are vital as they remove CO<sub>2</sub> from the air, storing the carbon and releasing O<sub>2</sub> into the air for us to breathe.

Trees are a fundamental part of our everyday lives, providing us with many things we take for granted.

# Wyre Forest

## Time for a visit?

We hope you find the time to come and visit Wyre - forest of discovery. Here are some fascinating facts about the forest:

- ★ It is an ancient woodland which has been here since the end of the Ice Age 10,000 years ago!
- ★ It is the same size as 6,000 football pitches
- ★ It is the third most important forest for wildlife in England

All life goes round in cycles from birth to death, and everything on earth is dependant on other living plants and animals. Above is the life cycle of an oak tree.
