

New eTimber Sales

Forestry England will shortly be introducing a new sales platform “eTimber Sales” for marketing and sale of our timber contracts.

We intend to go live with our new system by the end of May 2023.

The July 2023 national tender would be the first major sale, although we will run some smaller local sales and LTC negotiations in the new system to ensure all functionality is in place.

Access to eTimber Sales

Access to the new system will be limited to Timber Customers to view and bid on our tenders.

Timber Hauliers and Timber Contractors will also be given access to eTimber Sales, without any option to bid on tenders.

Forestry England will provide summary details of our live tenders on the new system. This information can be viewed without requiring a username for the system.

Transition of Users

It is our intention to migrate user details for Companies with active bidding history.

eMails were sent to all active Companies in November to seek confirmation and validation of user accounts which would be moved to our new system.

Unfortunately almost 40% of Companies did not respond to the emails requesting information.

Customers will have an opportunity to re-register for eTimber Sales in plenty of time before our July sale.

Historic Contract Information

Forestry England will provide an option in eTimber Sales for Customers to view all current live and completed contracts.

Customer Liaison Meetings

We will provide an overview on eTimber Sales at our Customer Liaison Meetings.

- Customer Liaison Meeting - North. Penrith. 17th May 2023
- Customer Liaison Meeting - South. Westonbirt. 24th May 2023

Questions

Any questions about eTimber Sales can be sent to etimber.sales@forestryengland.uk
