

Forestry England

What's Happening in Ennerdale

Sorry if our work affects your plans today. Some areas of the valley are closed due to timber harvesting. We are thinning the forest removing around 20% of the trees to make space for natural regeneration so the forest develops a more diverse structure and mix of tree species. We are also felling all the trees in some areas so we can replant with native species, open up the River Liza and help reduce the risk of the Phytophthora larch disease spreading. Please check signs for updates as the work will move around the valley through 2020.
